- Implemented responsive layouts and interactive user interfaces.
- Developed and customized WordPress websites using Elementor, CSS, and JavaScript.
- Worked on multiple web development projects, translating requirements into functional and user-friendly interfaces.
- Contributed to website performance optimization and technical SEO improvements.

Internship

React Native Summer training — Aug 2022 – Sep 2022
Information Technology Institute (ITI) — Menoufia branch, Egypt

Intensive training program, UI/UX Development — Mar 2025 – Aug 2025
Information Technology Institute (**ITI**) — Cairo University branch, Egypt

- Front-end Developer
- UI/UX Designer

Education

Faculty of Computer and Information science — Sep 2020 – Jul 2024
Bachelor's degree in Computer Science — Menoufia University
GPA: 3.0 / 4.0

Freelance Projects

Wethaq Family Association, Website & Dashboard — Apr 2025 – May 2025
Developed a marriage website for Saudi Arabia, including both the front-end and the admin dashboard using HTML, CSS, JavaScript, and Bootstrap. The design is fully responsive and supports Arabic (RTL), ensuring a smooth and user-friendly experience.

Soma Cosmetics, **E-commerce Website for Beauty Products** — Apr 2025 – Apr 2025
Built a responsive WordPress online store for hair, skin, and perfume products. Used WooCommerce for easy product management and smooth checkout. Focused on clean design and mobile-friendly experience.

VetraMax – UI/UX Design for Admin Dashboard & Mobile App — Oct 2024 – Jan 2025
Designed the UI/UX for VetraMax, a pet product sales platform for wholesalers, retailers, and farmers. Created easy-to-use and smooth user experiences using research, wireframes, and prototypes.
Tools: Figma | Adobe XD | User Research | Wireframing | Prototyping

Projects

Rento – ITI Graduation Project — Jul 2025 – Aug 2025
Developed a secure, user-friendly web application that allows clients to rent items and list their own for rental. Integrated AI features to enhance user experience, implemented strong security measures, and delivered a modern, fully responsive design.

Smart Traffic Light System, **Graduation Project (Grade: A+)** — Sep 2023 – Jul 2024
Developed a smart traffic light system using computer vision and embedded systems to optimize traffic flow and prioritize emergency vehicles. The system detects vehicle counts at intersections and adjusts signals accordingly, reducing congestion and emissions.
Technologies Used**:** Arduino | Computer Vision | Embedded Systems | Data Analysis Software.
